## WHAT WE DO

### Antitrust News & Analysis

Our Antitrust team is dedicated to reporting on complex antitrust litigation matters as well as larger non-merger antitrust decisions by the U.S. and foreign regulatory agencies. Coverage spans from global enforcement actions against Tech giants to cases of anticompetitive conduct between parties. Our reporting highlights potential issues companies face as a result of alleged anticompetitive conduct and follows each situation from investigation announcement through litigation or settlement.

### Corporate Investigations

Our Corporate Investigations team identifies companies and industries which may be impacted by existing or new rules and regulations coming from the regulatory agencies or from Congress. For individual companies we identify specific business practices which may face legal or regulatory risks. Our industry focused content examines new regulations which may materially impact an entire industry and highlights companies within the industry which may be most impacted by the change in regulation.

### Mergers & Acquisitions

Post deal announcement our M&A team succinctly identifies the antitrust and regulatory risks facing the merging parties. The subsequent reporting on each merger details the process at the reviewing agencies, allowing our subscribers to have a more thorough understanding of each agency's likely decision, what divestiture packages may include, and how arguments made by deal opponent/proponents are being received.

## Unparalleled Insight

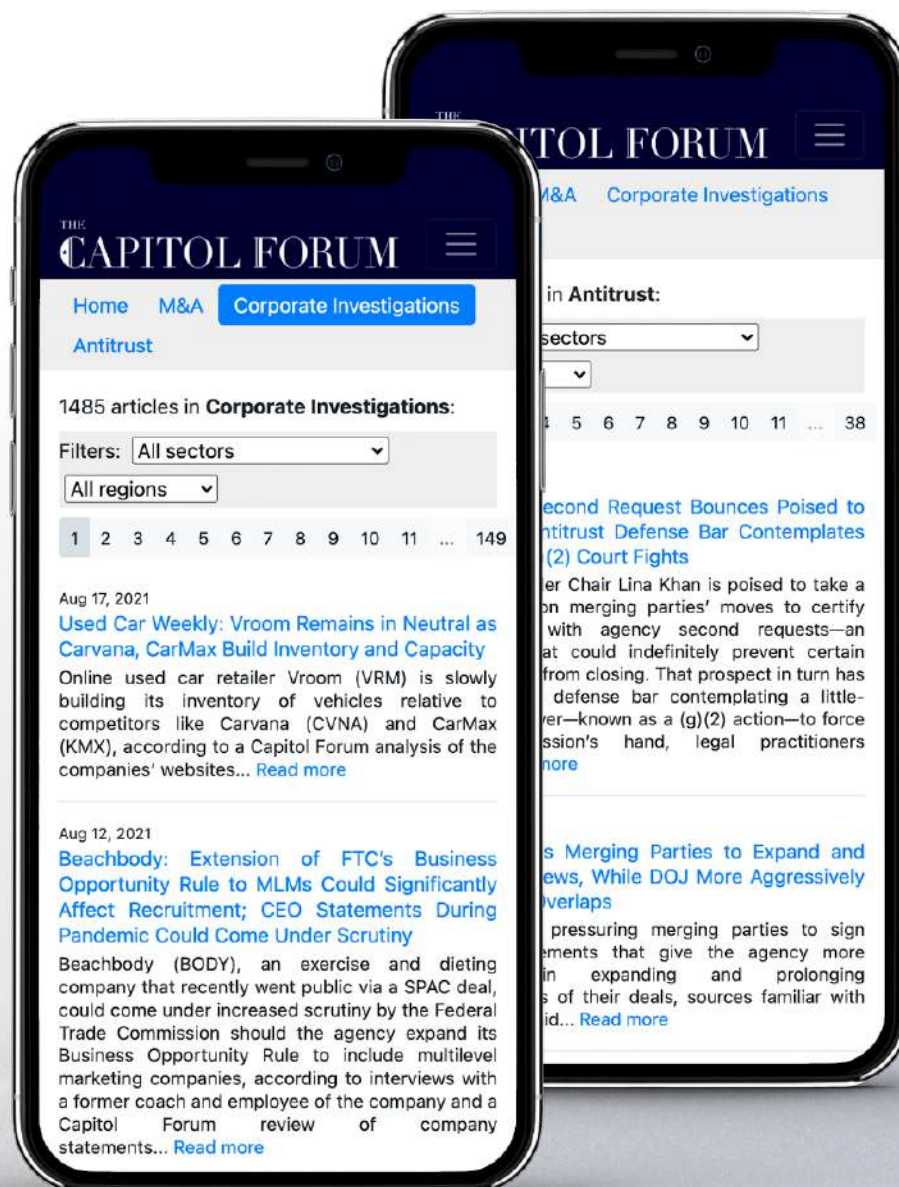

Since our inception in 2012, The Capitol Forum has cultivated a diverse subscriber base. Our audience primarily consists of top law firms, institutional investors, multinational corporations, and government agencies across the world.

The accuracy and rigor of our reporting makes our work a must-have for any cutting-edge organization that needs to stay attuned to the most recent regulatory and policy developments. Our work is often cited in government investigations, demonstrating the accuracy and validity of our coverage as well as the informational and timing benefits our subscribers enjoy in having access to our content.

Our team of investigative reporters is comprised of seasoned former attorneys as well as renowned journalists. The combination of legal and reporting talent helps create a news-breaking and deeply analytical product unmatched by any other media organization, research provider, or consultancy.

Our understanding of the relationship between economics, policy, politics, and the law provides subscribers with keen insights to the timing and most likely outcomes of complex M&A situations, antitrust outcomes, and corporate investigations.
